Emon Singha

Software Engineer

Maulvibazar, Sylhet, Bangladesh | 01743217209 / 01973217209 | emonsingha209@gmail.com |
linkedin.com/in/emon-singha209 | emonsingha.vercel.app

Summary

Software Engineer focused on frontend development with React and Next.js, turning product and design requirements into polished, production-ready interfaces. Also works across the stack with Node.js and Express, along with relational and NoSQL databases, and cares about writing code that stays maintainable as products grow.

Technical Skills

Languages & Frameworks: React, Next.js, Angular, TypeScript, JavaScript, Node.js, Express
Styling & UI: Tailwind CSS, Bootstrap, HTML, CSS, Web Components
Databases: PostgreSQL, MongoDB
Cloud, APIs & Integrations: OpenAI APIs, AWS S3, Stripe, Google Authentication, SendGrid/Nodemailer
Tools & Platforms: Git, GitHub, Vercel, Netlify, WordPress

Professional Experience

SJ Innovation LLC Sylhet, Bangladesh
Software Engineer L1 May 2026 – Present

- Built and maintained full-stack features end-to-end – from the UI down to REST APIs and database logic – using React, Node.js/Express, and MongoDB.
- Built AI-powered writing and coaching workflows on top of OpenAI's APIs, handling prompt construction, conversation state, intent resolution, and chapter reviews while keeping token usage efficient.
- Built out the manuscript editing pipeline, including DOC/DOCX/PDF parsing, chapter and section detection, rich-text editing, autosave, and document export.
- Integrated and maintained third-party services like AWS S3, Stripe, Google authentication, and SendGrid/Nodemailer, along with JWT-based authorization, email verification, and rate limiting.
- Improved performance and reliability through MongoDB query optimization, better error handling, and streaming responses, while supporting regression testing and production releases.

Junior Software Engineer L3 December 2025 – April 2026
Junior Software Engineer L1 December 2024 – November 2025
Intern Frontend Developer June 2024 – November 2024

- Advanced through three promotions in two years, progressing from Intern Frontend Developer to Software Engineer L1.

aamra infotainment ltd
Intern Web Developer September 2023 – December 2023

- Helped build engaging, user-friendly web interfaces.
- Built reusable UI components using HTML, CSS, JavaScript, and Bootstrap.
- Developed web pages using page builders, customized templates, and managed content in WordPress.

Projects

MockTaker *(Personal Project)* *Next.js, TypeScript, MongoDB, NextAuth, Cloudflare R2*
mocktaker.com

- Built a multi-tenant IELTS exam platform for coaching centres in Bangladesh, covering Listening, Reading, Writing, and full mock exams, plus centre-level assignments, quotas, and reviews.
- Built a 4-role permission system and a transactional submission flow so results save atomically and full-mock completion is properly gated. Also built a band scorer that uses official conversion tables and fuzzy matching to grade answers across multiple formats.
- Now used by 8 coaching centres, with 670+ student accounts and over 8,500 test submissions – including 2,300+ in each of July and August 2026.

StoryGroove *React, Node.js/Express, MongoDB, OpenAI Responses API, AWS S3*
storygroove.ai

- A SaaS platform that helps authors go from idea to finished manuscript, with AI writing and editorial agents, manuscript import, and AI-assisted cover design.

- Built Ellis, a conversational editorial agent that routes user intent using a mix of deterministic matching and an LLM classifier, pulls in chapter context on the fly, and streams responses back via SSE – covered with regression tests to keep behavior reliable in production.
- Built Cover Studio end-to-end: conversational cover coaching, quota-controlled AI image generation, canvas-based mask editing, live preview streaming, and version history backed by S3.

Education

Bachelor of Science in Computer Science and Engineering 2020 – 2023
American International University-Bangladesh (AIUB)

Core Strengths

- High-fidelity frontend implementation
- Scalable and maintainable web application development
- Clean architecture and reusable UI components
- Performance-conscious engineering
- Product-focused feature delivery
